AI ACTIVITY (PERFORMED BY AI)

DECISION/CONDITION

HUMAN VALIDATION REQUIRED BEFORE NEXT STEP

CUSTOMER

- All activities marked with the Human Validation indicator shall require confirmation through the Microsoft Teams Chatbot before the AI proceeds to the next workflow stage.
- The Common Sales Mailbox shall serve as the single source of truth for all leads entering the AI ecosystem.
- Discarded Leads shall not be converted into Opportunities. However, all discarded leads shall be archived and maintained in a separate Lead Database for future reference, reporting, analytics, re-engagement activities, and AI training purposes.
- Opportunity IDs shall only be generated after successful completion of customer classification and all mandatory information requirements.
- Opportunity ownership shall be automatically suggested by the AI based on predefined business rules and may be manually overridden by LJS or AH when required.
- All AI actions, classifications, assignments, notifications, validations, and user interactions shall be logged to maintain a complete audit trail.
- Customer classification (Green, Blue, Amber, Red) shall be governed by ModAE internal policies and may be revised by management at any time.
- The Fast Track Path applies only to Existing Green Customers and approved repeat business opportunities.
- This Lead Management Workflow applies to all Opportunity Types (Project, Upgrade, Retrofit, Service, Spares, and Flow).
- For Greenfield Opportunities (Projects & Upgrades), Phase-1 automation concludes at AI-08 (Opportunity Assignment & Notification). Subsequent proposal generation and engineering activities shall be implemented in future phases. But tracking and all customer communication is still included.
- All customer-facing communication generated by the AI shall be reviewed, validated, and released through authorized ModAE personnel and approved communication channels.
